

LIFE SAVING SIGNALS

The signals illustrated in this leaflet are those to be used by any ship or person in distress when communicating with search and rescue units. They have been agreed internationally for this purpose and it is important that you are familiar with them to ensure they are correctly used in distress situations.

The International Convention for the Safety of Life at Sea (SOLAS) in Regulation 29 of Chapter V requires you to have access to this table. You are advised to keep a copy on board, or if this is not practicable, at least to study the table before you go boating.
